

1080p vs 720p (vsdiff.com)

1080p (Full HD)	Feature	720p (HD)
1920 x 1080 pixels	Resolution	1280 x 720 pixels
~2.1 million pixels	Total Pixels	~921,600 pixels
Sharper, clearer, and more detailed images on large screens.	Image Quality	Good on smaller screens, but softer on TVs over 40 inches.
Current standard for streaming, Blu-ray, gaming, and modern TVs.	Industry Standard	Former HD standard, now considered entry-level.
Needs more bandwidth and storage.	Bandwidth & Storage	Less bandwidth and smaller file sizes.
Best for big screens (50"+), gaming, and home theaters.	Best Use	Good for laptops, smaller TVs, or saving data.
Noticeably sharper than 720p, less pixelation.	Visible Difference	Looks fine alone, but softer next to 1080p.
