

Face ID vs Fingerprint (vsdiff.com)

Feature	Face ID	Fingerprint
Security Level	High, uses infrared and depth sensors	Moderate, susceptible to fake fingerprints
Ease of Use	Effortless, just look at the device	Requires physical contact
Speed	Very fast, typically unlocks in a fraction of a second	Fast, but may vary based on the sensors
Performance in Low Light	Excellent, uses infrared technology	Good, but may struggle with wet fingers
Device Compatibility	Available on select models (e.g., iPhone X and later)	Widely available across many devices
