

## OLED vs LCD (vsdiff.com)

Feature	OLED	LCD
Image Quality	Superior contrast and color accuracy	Good but limited contrast, colors can appear washed out
Response Time	Faster response time	Slower response time
Energy Consumption	More efficient with dark images	Generally consumes more power
Viewing Angles	Wide viewing angles without color distortion	Color can shift at wider angles
Cost	More expensive to produce	More affordable options available
Durability	Susceptible to burn-in	More durable overall
