

## VPN vs Proxy (vsdiff.com)

Feature	VPN	Proxy
<b>Data Encryption</b>	<i>Yes, encrypts data for secure browsing.</i>	<i>No, primarily just hides IP address.</i>
<b>Speed</b>	<i>Can be slower due to encryption overhead.</i>	<i>Generally faster, minimal latency.</i>
<b>Privacy</b>	<i>Offers significant privacy protection.</i>	<i>Limited privacy, does not guarantee data security.</i>
<b>Usage</b>	<i>Ideal for secure browsing and accessing sensitive information.</i>	<i>Suitable for bypassing content restrictions.</i>
<b>Multi-Device Support</b>	<i>Can be used across multiple devices simultaneously.</i>	<i>Usually limited to one client at a time.</i>
