

Web Hosting vs Cloud Hosting (vsdiff.com)

Feature	Web Hosting	Cloud Hosting
Resource Allocation	Fixed resources shared among multiple sites	Dynamic resources allocated from multiple servers
Scalability	Limited; requires manual intervention	Highly scalable; resources can be adjusted automatically
Performance	Can be slow under high traffic	Consistently fast with higher traffic
Cost	Usually lower initial cost	Variable pricing based on usage
Data Redundancy	Single point of failure	Redundant systems to prevent downtime
Management	Often requires less technical knowledge	More complex management may require technical expertise
