

Gaming Mouse vs Office Mouse (vsdiff.com)

Feature	Gaming Mouse	Office Mouse
Design	Ergonomic with customizable shapes and often RGB lighting	Simplicity with a focus on comfort for extended use
Sensitivity	High DPI (up to 16,000) for precision in fast-paced games	Moderate DPI (typically 800-2000) suitable for general tasks
Buttons	Multiple customizable buttons for in-game actions	Fewer buttons (usually 3-5) for essential tasks like scrolling and right-clicking
Polling Rate	Higher (1000 Hz) for rapid response times	Lower (125 Hz) sufficient for standard use
Weight	Variety of weights offering customization for balance	Lightweight design for easy maneuverability
