

## LED vs OLED TV (vsdiff.com)

Feature	LED TV	OLED TV
Picture Quality	Good, but limited contrast	Exceptional, true blacks and vibrant colors
Viewing Angles	Restricted angles, colors fade	Wide viewing angles with consistent color
Brightness	Bright images, ideal for well-lit rooms	Lower maximum brightness but excellent in dark environments
Thickness	Thicker due to backlighting	Ultra-thin and sleek design
Lifespan	Long-lasting	May degrade over time (burn-in risk)
Price	Generally more affordable	Typically more expensive
