

Linux vs Windows (vsdiff.com)

Feature	Linux	Windows
Cost	Free	Paid (with various editions)
Source Code	Open-source	Closed-source
User Interface	Customizable (varies by distribution)	Standardized (Windows UI)
Security	Generally more secure; fewer viruses	More prone to malware and virus attacks
Software Availability	Limited commercial software; strong in open-source	Extensive commercial software support
Performance	Often performs better on older hardware	Can be resource-intensive
Community Support	Strong community forums and documentation	Official support and extensive online help
