Mobile App vs Web App (vsdiff.com)

Feature	Mobile Apps	Web Apps
Installation	Need to be downloaded and installed.	Accessible directly through web browsers.
Performance	Generally faster and more responsive.	Dependent on internet speed; can be slower.
User Experience	More personalized and can use device features.	Less personalized; limited access to device hardware.
Updates	Users need to download updates.	Automatically updated in the browser.
Cost	Higher development cost due to multiple platforms.	Generally lower cost; single codebase for all devices.
