

## Outsource IT vs In-House IT (vsdiff.com)

Criteria	Outsource IT	In-House IT
Cost	Potentially lower operational costs, pay-per-use model	Higher fixed costs due to salaries and benefits
Expertise	Access to a broader range of expertise	Limited to the skills and knowledge of existing staff
Control	Less direct control over the team and processes	Full control over operations and team
Flexibility	More flexible to changing requirements	Potentially slower to adapt
Risk	Risk of data breaches and vendor reliability issues	More control over data security
