Skill Development vs Career Development (vsdiff.com)

Aspect	Skill Development	Career Development
Definition	Focusing on acquiring and honing specific skills.	Broadening one's career path and opportunities within or outside an organization.
Objective	Improving individual competencies and overall ability.	Advancing one's position, responsibilities, or job satisfaction.
Scope	Narrow, targeting specific abilities (e.g., technical skills).	Wide, encompassing various aspects like networking, promotions, and reskilling.
Timeframe	Usually ongoing and targeted.	A long-term process focused on growth and progression.
Examples	Learning a programming language, mastering a software.	Seeking promotions, changing jobs, pursuing further education.
Importance	Essential for job performance and productivity.	Critical for employment security and career satisfaction.
