

VPN vs Tor Browser (vsdiff.com)

Feature	VPN	Tor Browser
Privacy Level	High, but depends on the provider's policies	Very High, anonymous through multiple relays
Speed	Generally fast, depending on server load	Slower due to multiple layers of encryption
User-Friendliness	Easy to use, often just one-click connection	Requires learning to navigate and may not support all sites
Cost	Usually subscription-based	Free to use
Access to Websites	Can access most websites, may be restricted in some countries	Can access .onion sites, may not support standard websites
