Wireless Router vs Mesh Network (vsdiff.com)

Feature	Wireless Router	Mesh Network
Coverage Area	*Limited* to the strength of its antenna	*Extensive* coverage with multiple nodes
Setup Complexity	Usually *simple* and straightforward	*A bit more complex* but often user-friendly
Performance	May suffer in dead zones	Maintains consistent performance throughout
Scalability	*Limited* without additional devices	**Highly scalable** by adding more nodes
Price	Generally more affordable	Usually a higher initial investment
