

LED TV vs OLED TV (vsdiff.com)

Feature	LED TV	OLED TV
Brightness	High brightness levels with LED backlighting	Lower peak brightness but better in dark scenes
Black Levels	May display grays in dark scenes	True blacks thanks to pixel-level lighting
Color Accuracy	Good but occasionally less vivid	Excellent with more vibrant colors
Viewing Angles	Limited viewing angles; colors wash out off-axis	Wider viewing angles with consistent quality
Lifespan	Long lifespan with durable technology	Historically shorter, but improving with newer models
