

Smart Home vs Traditional Home (vsdiff.com)

Feature	Smart Home	Traditional Home
Definition	<i>A home equipped with devices that automate tasks and improve efficiency.</i>	<i>A conventional home with standard appliances and systems.</i>
Control	Remote and centralized control through apps and devices.	Manual control; reliance on physical devices.
Energy Efficiency	Significantly higher, due to automated energy management.	Generally lower; energy use is less optimized.
Initial Cost	Higher upfront investment for technology integration.	Usually lower initial cost.
Security	Enhanced security features: smart cameras, locks, and alarms.	Standard security measures, usually requiring manual checks.
Maintenance	Requires technical knowledge; potential software issues.	Easier to maintain, less reliance on tech.
Customization	Highly customizable; ability to integrate various technologies.	Limited customization options.
